SUMMARY

Software engineer with 1.5+ years shipping fintech, iGaming, and AI products end to end: idempotent wallet and payment systems, edge-serverless platforms, and LLM pipelines in TypeScript and Python, built for financial correctness and security.

EXPERIENCE

Software Engineer, Amex Technology — Ahmedabad, India **Jul 2026 – Present**

- **SimpleT:** Built a Salesforce AI translation SaaS with bidirectional Metadata API sync over OAuth 2.0 and multi-engine translation (DeepL, OpenAI, Claude, Gemini) on Django, Celery, Redis, and GKE; grew XLIFF coverage from 3 to 8 metadata types.
- Audited 33 SimpleT backend modules for **ISO/IEC 27001:2022**, **SOC 2**, and **GDPR**; resolved the top 25 security and authorization issues and encrypted all API keys and Salesforce tokens at rest.
- **FirmsLedger:** Architected a programmatic directory of 10,000+ US manufacturers on Cloudflare Workers, Neon Postgres, and Drizzle ORM with 36–80 ms page loads; built a dual-model NVIDIA Nemotron pipeline that fact-checked 9,480+ company profiles.
- **GoSwiftFund:** Engineered a small-business lending marketplace with Plaid bank verification, AES-256-GCM encryption at rest, rules-based routing across 8 lenders, and instant SmartBiz API pre-qualification.
- Implemented JWT/RBAC auth, PostgreSQL row-level security, and Stripe, Shopify Storefront, and Retell AI voice-agent integrations across client web and React Native (Expo) apps, plus SEO sites scoring 99–100/100.

Backend Engineer, Betorra (iGaming Platform) **Jan 2026 – Jun 2026**

- Architected a NestJS/TypeScript modular-monolith casino backend serving **1,200+ games** across 2 direct providers (OnlyPlay, Jacktop) and 1 major aggregator (EGS) aggregating 25+ game studios, with real-time session management on PostgreSQL, Prisma, and Redis.
- Engineered an idempotent **seamless-wallet engine** for debit, credit, rollback, and settlement callbacks, using session-level mutex locking to eliminate double-spend and race conditions.
- Secured provider callbacks with **HMAC-SHA256/MD5** signature verification and kept multi-currency balances consistent through exchange-rate locking and automated reconciliation.
- Integrated the Payram crypto gateway with replay-protected webhooks and automated payouts; built a GGR affiliate revenue-share module on EventEmitter2 events with row-level locking (`SELECT ... FOR UPDATE`).
- Built bet-cycle simulation and dual-ledger E2E suites that verified zero-discrepancy balances before certification; shipped to AWS via multi-stage Docker builds and GitHub Actions CI/CD.

AI Engineer, DubFlix **Jun 2025 – Dec 2025**

- Built generative-AI dubbing and translation pipelines (ElevenLabs, Whisper) that localized content into 5+ languages for OTT clients including KukuFM and Pocket TV.
- Cut manual sound-editing time 40%+ by automating audio-video sync, diarization, and pause alignment; mentored 10+ interns.

Full-Stack Developer Intern, Grownited Pvt. Ltd. · Python Backend Intern, 360 Design **Jun 2024 – Apr 2025**

- Built ChillSpace marketplace APIs with JWT RBAC, indexed MongoDB schemas, and Razorpay checkout; built Django REST APIs.

PROJECTS

CarSUVParts — Automotive parts e-commerce with real-time US NHTSA vPIC VIN decoding and Retell AI voice agent. *React 19, TypeScript, Vite, Retell AI, NHTSA API*

The Heritage Solution Network — Astro 7 SSR healthcare platform with 99/100 technical SEO score and 135+ Playwright E2E tests. *Astro 7, React 19, TypeScript, Playwright*

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C#

Backend: Node.js, NestJS, Express, Django/DRF, Celery, REST, Webhooks, Swagger/OpenAPI, event-driven design

Frontend: Next.js 16, React 19, React Native (Expo), Tailwind CSS, Vite

Data: PostgreSQL (Neon, Supabase), Redis, MongoDB Atlas, Prisma, Drizzle ORM, Cloudflare R2

Cloud & DevOps: AWS (EC2, S3), Cloudflare Workers, GKE, Docker, GitHub Actions, Vercel, Linux

Payments & Security: Plaid, Stripe, Razorpay, crypto gateways, HMAC-SHA256, JWT, RBAC, row-level security

AI & Testing: OpenAI, Claude, NVIDIA Nemotron, Whisper, ElevenLabs, Retell AI · Jest, Supertest, Playwright

EDUCATION

B.E. Computer Engineering, SAL College of Engineering — Ahmedabad · CGPA 7.43/10 **Sept 2021 – May 2025**
